

Mini Pressure Gauge

Mini pressure gauge is one of kind of micro pressure gauge which is mainly used for the measurement for pneumatic and special small type of equipment. This gauge is characterized by flexible operation, high accuracy and various mounting style. It can also be customized.

Size: 1"(25mm)

Pressure Range: 30 psi~5000 psi

Socket: Brass center back mount

Connection Thread: NPT , BSP, BSPT, PT, ZG, or other

Tube: Copper alloy

Window(Lens): Polycarbonate

Dial plate: Single and dual scale (psi, kpa, mpa, bar, kg/cm²)

Accuracy: 3-5% of full scale

Ambient Temperature: -40°C to 60°C
